

Development of Measures of Adherence (DOMA) Screener Form

Conduct Informed Consent and obtain signature before initiating survey.

As described in the consent form, the goal of this study is to develop better ways of asking people how they use products in HIV prevention research. We will also try to understand what makes it easy or difficult for people to use the products in trials. Some of our questions are about how people think about HIV prevention research and products. We will ask you those questions even if you have never participated in research. Other questions are about experiences you may have had in past research. We will only ask those questions to women who participated in past research. Past studies evaluated a vaginal ring (ASPIRE), an oral daily pill (VOICE) or a vaginal gel (VOICE and FACTS.)

How old are you?

Have you ever participated in a clinical trial that was testing a new HIV prevention product?

0=No **SKIP to NON-Trial PPTs INFO**
1=Yes

[If yes] What type of product did you use the last time you participated in research?

1=Vaginal Ring
2=Oral Pill (PrEP)
3=Vaginal Gel
4=Other **SKIP to NON-Trial PPTs INFO**

[TRIAL PPTS INFO]:

Take a moment to think about the first time you heard about the research. Recall what you first thought about it when you heard. Think about any conversations you may have had with friends and family about the research. Then think about how you felt and what you thought as you decided to volunteer. Now. Pretend it is the day you decided to volunteer. Try to think about what you thought about then, how you felt. How would you have answered these questions? Ready?

[NON-TRIAL PPTS INFO]:

Clinical trials are research studies that test whether a new drug or a new medical procedure works the way it is supposed to. For example, in this community several trials have been conducted to see if different products work to protect against HIV infection. Some products that have been tested include a vaginal gel, oral pills and a vaginal ring. Have you heard of any of these trials? (If yes, which trials have you heard about?) When a woman joins this research, she may be given the product that is being tested or another product that is similar but doesn't contain the drug. The product that doesn't have the drug in it is called a placebo. A computer determines which product she receives, much like flipping a coin. All women are also counseled to use condoms.

Imagine that we were conducting new research and you were invited to participate. How much would you disagree or agree with the following statements?

ORIENT THE PARTICIPANT TO THE RESPONSE SCALE.

There are no wrong answers; I'm interested in hearing your opinion. Here's how it will work. I will read a statement out loud and then you will tell me if you agree or disagree with it - and how much you agree or disagree with it.

1=Disagree A LOT
2=Disagree Somewhat
3=Disagree A Little
4=Agree A Little
5=Agree Somewhat

					6=Agree A LOT		
1. BELIEFS ABOUT HIV PREVENTION TRIALS							
<p><i>OK. First, we want to explore women's opinions or thoughts about HIV prevention research. If you have already participated in research, think back to your experience. What questions or concerns did you have, if any? What did you understand about the research? Consider whether you felt like you could TRULY trust the research and the staff, or whether you had conflicts with them, or with people in your community - your family or friends - about being in the research. ...</i></p>							
Perceived Ease or Difficulty of Trial Participation (3 ITEMS)							
<p><i>The first few questions are about how easy or difficult you thought it would be to do all the things [asked / required] of you during the research. We understand that participating in research can be demanding, especially if you have lots of other demands in your life. Again, please be as honest with me as you can as you respond. OK...?</i></p>							
ITEM		DISAGREE			AGREE		
		Lot	Some	Little	Little	Some	Lot
1	The research will take a lot of my time.	1	2	3	4	5	6
2	I think the care I get as a research participant is the same as the care I get in the local clinic.	1	2	3	4	5	6
3	I do not believe that participating in research will be difficult for me.	1	2	3	4	5	6
Sufficient Information about Trial Participation (5 ITEMS)							
<p><i>The next few items are about the information you are given when you are deciding whether or not to participate in research. Potential participants usually get information from advertisements in the community, or maybe from their friends or family members. Then, when you come to the research site, you hear about the research in detail from the staff, and are asked to sign a consent form. Do you remember this process?</i></p>							
ITEM		DISAGREE			AGREE		
		Lot	Some	Little	Little	Some	Lot
4	The research staff told me everything I needed to know about the research.	1	2	3	4	5	6
5	I was given clear information about the research.	1	2	3	4	5	6
6	I was not given enough time to decide if I wanted to participate in the research.	1	2	3	4	5	6
7	I know that I can leave the research at any time.	1	2	3	4	5	6
8	It would be okay if I decided not to participate in the research.	1	2	3	4	5	6
Understanding about Experimental Context (5 ITEMS)							
<p><i>The next section is about research itself. ... Ready...?</i></p>							
ITEM		DISAGREE			AGREE		
		Lot	Some	Little	Little	Some	Lot

9	I believe that the staff will give me a product that works.	1	2	3	4	5	6
10	I do not want to take a non-active product.	1	2	3	4	5	6
11	I am worried that the product is experimental.	1	2	3	4	5	6
12	I do not want to be used for an experiment.	1	2	3	4	5	6
13	I am willing to be used for an experiment.	1	2	3	4	5	6
Concerns about Safety or Side Effects (6 ITEMS)							
<i>The next items are about how you might feel about safety in the research, and about whether you were ever concerned about the product causing you distress in any way.</i>							
ITEM		DISAGREE			AGREE		
		Lot	Some	Little	Little	Some	Lot
14	I don't see any danger in participating.	1	2	3	4	5	6
15	I worry that participating in research could lead to future health problems.	1	2	3	4	5	6
16	I am fairly sure that the product is safe.	1	2	3	4	5	6
17	I do not know if the research product is safe.	1	2	3	4	5	6
18	I believe that people who participate in HIV prevention research can experience unpleasant side effects.	1	2	3	4	5	6
19	I am worried that I will get HIV because I am using the research product.	1	2	3	4	5	6
Positive/Negative Expectations about Product Use (5 ITEMS)							
<i>The next items are about what you might think would, both good [positive] things and not-so-good or even bad things, if you join new research.</i>							
ITEM		DISAGREE			AGREE		
		Lot	Some	Little	Little	Some	Lot
20	I believe that the research product will keep me from getting HIV.	1	2	3	4	5	6
21	It's hard to believe that the research product will help me.	1	2	3	4	5	6
22	The advantages of using the research product are more than the disadvantages.	1	2	3	4	5	6
23	I think I will like using the research product more than condoms.	1	2	3	4	5	6
24	I do not trust that the research product can prevent HIV.	1	2	3	4	5	6
SDB - Part I (8 ITEMS)							
<i>Now we would like you help to develop questions that would help us better know the participants who join research. These statements are not directly about the participant's understanding of the research. They are also not about their experiences in the research. Instead, they are more about the participant's general attitudes, their likes and dislikes. I will ask some questions now and some more questions later in the interview. Please listen to each statement, and tell me how much you generally disagree or agree. Then tell me whether you disagree/agree a little, somewhat or a lot.</i>							
ITEM		DISAGREE			AGREE		

		Lot	Some	Little	Little	Some	Lot
25	I don't care what other people think of me.	1	2	3	4	5	6
26	I never hesitate to go out of my way to help someone in trouble.	1	2	3	4	5	6
27	I have never intensely disliked anyone.	1	2	3	4	5	6
28	I sometimes feel angry when I don't get my way.	1	2	3	4	5	6
29	I like to gossip at times. (By gossip, we mean talking behind people's backs.)	1	2	3	4	5	6
30	I do not always tell the truth.	1	2	3	4	5	6
31	No matter who I'm talking to, I'm always a good listener.	1	2	3	4	5	6
32	I can remember "playing sick" to get out of something.	1	2	3	4	5	6
Trust or Distrust (5 ITEMS)							
<i>These next questions are about how much you trust - or do not trust - the research itself, or the research staff, or even the science behind the product.</i>							
ITEM		DISAGREE			AGREE		
		Lot	Some	Little	Little	Some	Lot
33	I do not trust research in general.	1	2	3	4	5	6
34	I might lose more than I gain by participating in HIV prevention research.	1	2	3	4	5	6
35	I think joining the research will give me hope.	1	2	3	4	5	6
36	Researchers at the clinic are not truthful.	1	2	3	4	5	6
37	I admit I am distrustful of foreign (white) HIV prevention researchers.	1	2	3	4	5	6
Concern about Social Stigma (2 ITEMS)							
<i>The next set of items are about how research participants like yourself might be treated by people in their communities and how that might impact their willingness or ability to participate in the research.</i>							
ITEM		DISAGREE			AGREE		
		Lot	Some	Little	Little	Some	Lot
38	People who participate in HIV prevention research may be rejected by others.	1	2	3	4	5	6
39	I am concerned that people may harass me for participating in this research.	1	2	3	4	5	6
2. REASONS FOR TRIAL PARTICIPATION (17 ITEMS)							
<i>The items we're about to review are about why women might decide to join research. What I'd like you to do is listen to each statement I will read, and without thinking too much, give me a response 1 disagree a lot-6 agree a lot. Then I'll ask you to think about the way we worded the items.</i>							
ITEM		DISAGREE			AGREE		
		Lot	Some	Little	Little	Some	Lot
40	I want to contribute to scientific information.	1	2	3	4	5	6

41	I feel that I will benefit from the research, whether the product works or not.	1	2	3	4	5	6		
42	Finding new HIV prevention products would be worth any inconvenience of participating.	1	2	3	4	5	6		
43	I want to learn more about HIV prevention.	1	2	3	4	5	6		
44	I want to take part in the fight against HIV.	1	2	3	4	5	6		
45	I want to reduce my chances of getting HIV.	1	2	3	4	5	6		
46	I want free health care.	1	2	3	4	5	6		
47	I want to participate in HIV prevention research because research is important to improve health.	1	2	3	4	5	6		
48	I want to help the researchers.	1	2	3	4	5	6		
49	I feel my participation in research will help find effective HIV prevention products.	1	2	3	4	5	6		
50	I want to be valuable to the community.	1	2	3	4	5	6		
51	I think the research will improve my health.	1	2	3	4	5	6		
52	I want to obtain the latest HIV information.	1	2	3	4	5	6		
53	I am motivated by the money I get for participating in the research.	1	2	3	4	5	6		
54	I am motivated by free medical check-ups.	1	2	3	4	5	6		
55	I am proud to help in the fight against AIDS.	1	2	3	4	5	6		
Reasons for Trial Participation - Ranking Exercise									
<i>Now, I am going to read a group of statements about reasons that some women join research. Think back to when you decided to volunteer to participate in the research. From the list, choose the 3 items that were MOST TRUE for you then.</i>									
<i>[Interviewer: Once the participant chooses, note all 3 of her responses by selecting them.]</i>									
	ITEM	1st	2nd	3rd	4th	5th	6th	7th	8th
	I want to participate in HIV prevention research because research is important to improve health.	1	2	3	4	5	6	1	2
	I think the research will improve my health.	1	2	3	4	5	6	1	2

24	Side effects made it difficult for me to keep using the vaginal ring.	1	2	3	4	5	6
25	Sometimes, if I felt worse when I had the vaginal ring in my body, I stopped using it.	1	2	3	4	5	6
26	The vaginal ring improved my sex life.	1	2	3	4	5	6
27	I was sometimes afraid the ring would get lost in my body.	1	2	3	4	5	6
28	I sometimes wondered if the ring was in place because I didn't even feel it.	1	2	3	4	5	6
29	Vaginal ring side effects interfered with my sex life.	1	2	3	4	5	6
30	It was difficult for me to explain the research to my friends.	1	2	3	4	5	6

Self-Efficacy (5 items)

Thank you. These next questions refer to a woman's confidence or ability to use the research product or follow the research plan. As with other sections, there are no right or wrong answers, just your opinion. Please let us know what you think.

		DISAGREE			AGREE		
		Lot	Some	Little	Lot	Some	Little
31	I was tempted to stop using my vaginal ring when side effects began to interfere with daily activities.	1	2	3	4	5	6
32	I was completely confident that I could continue to use the vaginal ring when I was not feeling well.	1	2	3	4	5	6
33	I was able to deal with any problems in following my research plan.	1	2	3	4	5	6
34	I needed help to follow my research plan.	1	2	3	4	5	6
35	I was not always sure that I inserted the vaginal ring correctly.	1	2	3	4	5	6

Enacted Adherence To Product (7 items)

There are many reasons that a woman may or may not be able to use her product exactly as she was instructed during the research. In previous research on vaginal rings, women have described several reasons why they removed their rings, either for short or longer periods of time. Please tell me how much you disagree or agree with the following statements, when thinking about your own use of the vaginal ring.

		DISAGREE			AGREE		
		Lot	Some	Little	Lot	Some	Little
36	There were times when the vaginal ring <i>came out by itself</i> .	1	2	3	4	5	6
37	I removed the vaginal ring <i>during my menses</i> .	1	2	3	4	5	6
38	I did not remove the vaginal ring at any time, except <i>during</i> a clinic visit.	1	2	3	4	5	6
39	I sometimes removed the vaginal ring <i>to clean it</i> .	1	2	3	4	5	6
40	I removed the vaginal ring <i>when I had sex with my partner</i> .	1	2	3	4	5	6
41	There were times when I removed and reinserted the vaginal ring.	1	2	3	4	5	6
42	If I took out my vaginal ring to have sex, I sometimes forgot to put it back in for several hours.	1	2	3	4	5	6

Clinic Staff Support (6 items)

In this section, we want to know more about the research staff. Many research participants have very good relationships with the staff, but some don't. And sometimes, women have good relationships with some staff, but not all the staff conducting the research. We'd like to know more about your experiences with research staff.

		DISAGREE			AGREE		
		Lot	Some	Little	Lot	Some	Little
43	The clinic staff were very friendly with me.	1	2	3	4	5	6
44	I was sure I could discuss truthfully with the clinic staff any problems related to the vaginal ring.	1	2	3	4	5	6
45	I think there were times when the research staff was disappointed in me.	1	2	3	4	5	6
46	Sometimes I felt that research staff thought I didn't understand how to use the vaginal ring.	1	2	3	4	5	6
47	I often thought the research staff didn't tell me everything they know about the research.	1	2	3	4	5	6
48	I never felt that the research staff judged me.	1	2	3	4	5	6
Sociodemographic and Behavioral Information							
<i>Thank you. We're almost done! Before we end, we a few final questions about your household and your current relationships. This information will help us better understand the ways that you answered earlier questions.</i>							
1	What type of home do you live in, is it a house, a townhouse, a flat, single room or a shack?	<input type="checkbox"/> ₁ Free standing house <input type="checkbox"/> ₁ Townhouse <input type="checkbox"/> ₁ Flat <input type="checkbox"/> ₁ Single room <input type="checkbox"/> ₁ Shack <input type="checkbox"/> ₁ Other, specify: _____					
2	Who do you currently live with? <i>(mark all that apply)</i>	<input type="checkbox"/> ₁ Parent/s (mother and/or father) <input type="checkbox"/> ₁ Other family (non-parent) <input type="checkbox"/> ₁ Primary sex partner <input type="checkbox"/> ₁ Own children <input type="checkbox"/> ₁ Other, specify: _____					
3	Do you have any children of your own?	<input type="checkbox"/> ₀ No <input type="checkbox"/> ₁ Yes					
4	How many children do you have?	<input type="text"/> <input type="text"/>					
5	In total, how many people live in your household?	<input type="text"/> <input type="text"/>					

6	How would you describe your current relationship status? Would you say you are:	<input type="checkbox"/> ₁ Married, or living as married with regular partner <input type="checkbox"/> ₂ Have regular partner(s), not living together <input type="checkbox"/> ₃ Sexually active, no regular partner(s) → Go to Q11 <input type="checkbox"/> ₄ Not sexually active currently → Go to Q11
7	For how long have you had this partner? (<i>mark one</i>)	<input type="text"/> <input type="text"/> years
8	How old is your regular (main) sex partner?	<input type="text"/> <input type="text"/> years
9	Were you with this partner when you last participated in HIV prevention research?	<input type="checkbox"/> ₀ No <input type="checkbox"/> ₁ Yes
10	Does this partner, or any other sexual partner(s) provide you with financial and/or material support?	<input type="checkbox"/> ₀ No <input type="checkbox"/> ₁ Yes
11	Do any of your sexual partner(s) have sex partners other than you?	<input type="checkbox"/> ₀ No <input type="checkbox"/> ₁ Yes <input type="checkbox"/> ₂ Don't Know
12	At your most recent sexual encounter, did you discuss condom use with your sexual partner?	<input type="checkbox"/> ₀ No <input type="checkbox"/> ₁ Yes
13	The last time you had sex, how willing were you to have sex? Would you say you were:	<input type="checkbox"/> ₁ Willing or wanted to have sex <input type="checkbox"/> ₂ Persuaded or coerced (<i>unsure, talked into sex</i>) <input type="checkbox"/> ₃ Physically forced or raped
14	The last time you had vaginal/anal sex, did you use a male or female condom?	<input type="checkbox"/> ₀ No <input type="checkbox"/> ₁ Yes
15	What is your highest level of education? (<i>mark one</i>)	<input type="checkbox"/> ₁ No schooling <input type="checkbox"/> ₂ Primary school, not complete <input type="checkbox"/> ₃ Primary school, complete <input type="checkbox"/> ₄ Secondary school, not complete <input type="checkbox"/> ₅ Secondary school, complete <input type="checkbox"/> ₆ Attended college or university, not complete <input type="checkbox"/> ₇ Attended college or university, complete
16	Do you currently earn an income of your own?	<input type="checkbox"/> ₀ No <input type="checkbox"/> ₁ Yes → Go to Q17

17	How do you earn your current income? <i>(mark all that apply)</i>	<input type="checkbox"/> ₁ Formal employment <input type="checkbox"/> ₂ Self-employment <input type="checkbox"/> ₃ Other, specify: _____
<p><i>Thank you for your time and willingness to answer our questions. As I described at the beginning of the interview, we hope that this information will help us to find better ways to support product use in future HIV prevention research. The information may also be useful for clinic providers who counsel women in use of family planning or other types of product use, where adherence is important.</i></p>
